## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: the disclosure does not contain a heading entitled Brief Description of the Drawings (MPEP 608.01(f)). Appropriate correction is required.

### ***Claim Objections***

Claim 33 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Step f) of the independent claim already includes a step of regenerating the catalyst.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 38 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no antecedent basis for the term "polynitrile."

***Allowable Subject Matter***

Claims 20-32 and 34-37 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art appears to be US 6,080,372, which teaches a two stage reactor for continuous three phase slurry hydrogenations (abstract; Figure 1). The reference neither teaches nor suggests the instant process.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 6,232,488 B1 is cited to show a related reactor for the hydrogenation of dinitriles.
